**Subject:** Re: Deletion docket

Dear Jennifer, Steve and Jesse,  
I am doing my due diligence as a voting member of the VB/I-70 Superfund Site Community Advisory Group (CAG) so that I may be a contributing member of this CAG.

I believe that regulations stipulate that all public *documents* for VB-I 70 are to be stored in the file at the local public library, not a CD.

Many people do not have access to a computer to look at the documents on CD.

CDs become corrupted and soon may be obsolete like the floppy disc.

Also, computers at the library are not always available.

Regardless, documents, not CDs, are to be stored in the file.

According to the librarian, documents have *never* been stored in the file.

I request that a complete file of documents be placed in the file at the library.

***The public has never had access to the documents in the library as prescribed by law, upon which the proposed deletion is based.***

Do the CAG documents that you reference, in the file include the 4 Resolutions for advisories to the EPA recently passed by the CAG and minutes and of CAG meetings and presentations since July 2018?

Do you have a list of CAG documents in the file?

You mention that the file with one piece of paper and one CD has been stolen from the library twice.

Perhaps you could ask the librarian what security measures are being taken to protect this crucial information so that it is available to all?

What steps have you taken to insure that the public will always have access to the complete set of public documents?

Do you have a list of documents that belong in the file? If so, may i have a copy?

Thanks,

Bridget

CAG Member

The documents will be placed in the information repository when the Notice of Intent to Delete is published and the public comment period starts. Meanwhile, last time I checked a couple of months ago, there were cds with the entire administrative record for OU2 removal action, as well as cds with all the significant documents to date for OU2 in general. In addition, there were a couple of site fact sheets, contacts, and the CAG Binder that was filled to bursting with information in both English and Spanish about the site. I will check and see if it's all gone missing. That would be at least the second time that someone has taken it.

**Subject:** Deletion docket

"It is recommended that regional program offices work with their regional Superfund deletions coordinators and records management staff to ensure that complete copies of the documents in the deletion docket are developed and placed in the appropriate regional, local, and FDMS site repositories. The public will have an opportunity to review the docket during the 30 day public comment period that follows publication of the Notice of Intent to delete. Delete (NOID). Public meetings are optional. Deletion notices are optional."

Dear Steve,

Do you intend to update the public file for VB/I70 at the public library? The last time I checked there was one thin piece of paper in the file and it had been that way, according to the librarians, forever. Is that Jesse's responsibility or Jennifer's?

Thanks for your help.
